## EDUCATION

### BACHELOR OF TECHNOLOGY

Nove de Julho University (UNINOVE)  
2008 - 2012

## SKILLS

- Front-end Web (React / Next.js)
- Back-end (C# / Java / Python)
- Blockchain Engineer (Solidity)
- Test Engineer (Chai, Mocha, Xunit)
- Problem-Solving (Hackerrank certificate)
- CI/CD Process Builder
- Transparent communication
- Meeting facilitator

## INTERESTS

- Reading technical books and blogs
- Cryptocurrencies and Blockchain
- AI, Machine Learning
- Blockchain Engineer (Solidity)
- Participation in Hackathons or coding events
- Agile practices and DevOps culture

## SUMMARY

Full Stack Software Engineer and Blockchain Developer with extensive experience in cutting-edge technologies. Passionate about innovation and digital transformation, with a strong ability to develop robust and efficient solutions. Committed to delivering high quality and promoting a culture of continuous learning.

## EXPERIENCE

### SOFTWARE ENGINEER FULL STACK (WEB2 / WEB3)

Govinda Systems DAO - Self-Employed  
fev de 2021 - jun de 2023 · 2 anos 5 meses

- Specialized in blockchain technology and the development of decentralized applications (DApps).
- Developed and implemented smart contracts on the Ethereum network.
- Full-stack development using languages such as Solidity, C#, Java, and JavaScript.

### SOFTWARE ENGINEER FULL STACK

MERX - Full-Time  
ago de 2022 - mai de 2023 · 10 meses

- Application Development: My work primarily focused on developing applications for Derivatives and Geotechnology, catering to a niche market of Producers, Grain Traders, Transporters, Traders, and Exporters.
- Continuous Improvement: I continuously worked to improve existing processes and systems, aiming to increase the efficiency and quality of the software produced.
- Use of Various Technologies: I utilized a range of technologies, including React, Java Spring, Pipeline CI/CD Bitbucket, AWS EC2, AWS EKS, Postgresql & Postgis, Newrelic, and Logz.io, for the successful development and deployment of our software solutions.

### RELEASE TRAIN ENGINEER

C&A - Full-Time

nov de 2021 - jun de 2022 · 8 meses

- Developed Software Release processes and trained teams in these processes.
- Transparently communicated and escalated impediments.
- Analyzed the delivery flow to map bottlenecks and implement process improvements.

### SOFTWARE ENGINEER

C&A - Full-Time

jun de 2019 - nov de 2021 · 2 anos 6 meses

- End-to-End Development: Managed full software development lifecycle, from concept to deployment. Implemented CI/CD pipelines to boost team productivity.
- Application Architecture: Designed efficient application architectures balancing cost and benefit.
- Technology Utilization: Used technologies like C#, Java, MongoDB, Redis, Gitlab, Docker, AWS services for software implementation.

### SOFTWARE ENGINEER

Iteris Consultoria e Software - Full-Time

set de 2015 - jun de 2019 · 3 years 9 month

- Performance Improvement: Investigation and resolution of root causes of problems, significantly enhancing the performance of our applications.
- Incident Response Tools: Development of tools to optimize incident response times.
- Training New Team Members: Providing training for new team members.
- Integration and Consultation: Experience with integrations via ISO8583 and support for updates to the specifications of flags (e.g., VISA, MASTER).
- Automated Testing: Implementation of automated testing to ensure the robustness and reliability of our software.
- Technology Utilization: Used technologies like C#, Oracle, Gitlab (CI/CD), Docker, AWS services for software implementation.
